
✓ INTERVIEW PREPARATION – QA ENGINEER (BANKING / FINTECH)

◆ PART 1: Interview Flow (English – Simple)

Usually interview has 4 rounds:

1. **Self Introduction**
 2. **Manual Testing Questions**
 3. **API Testing (Postman) Questions**
 4. **Banking Domain + Project Questions**
-

◆ PART 1: Interview Flow (मराठीत)

Interview साधारण 4 भागात असतो:

1. Self Introduction
 2. Manual Testing
 3. API Testing (Postman)
 4. Banking Domain + Project based questions
-

✓ PART 2: SELF INTRODUCTION

✦ English (Tell like this)

My name is Rahul Londhe.

I have 3.3 years of experience as a QA Engineer.

I have worked mainly on Manual and API testing in the Banking and Fintech domain.

I have experience in Core Banking modules like Fund Transfer (NEFT, RTGS, IMPS, UPI), Account Management, KYC, and Authentication flows.

I have used tools like Postman for API testing, JIRA for defect tracking, and SQL for database validation.

Currently, I am working at SBD Infratech as a Software Quality Analyst.

✦ Marathi (असंच बोला)

माझं नाव राहुल लोंढे आहे.

मला QA Engineer म्हणून 3.3 वर्षांचा अनुभव आहे.

मी मुख्यतः Banking आणि Fintech domain मध्ये Manual आणि API testing केलं आहे.

Core Banking modules जसे NEFT, RTGS, IMPS, UPI, Account Management, KYC आणि Authentication यावर काम केलं आहे.

Postman, JIRA आणि SQL ही tools वापरली आहेत.
सध्या मी SBD Infratech मध्ये Software Quality Analyst म्हणून काम करतो.

✓ PART 3: MANUAL TESTING QUESTIONS

🔗 Q1. What is Manual Testing?

English:

Manual testing means testing software by hand without using automation tools.

Example:

Login page open करून username/password टाकून check करणे.

Marathi:

Manual testing म्हणजे software हाताने test करणे, automation tool न वापरता.

उदाहरण:

Login page वर चुकीचा password टाकून error येतो का ते पाहणे.

🔗 Q2. What is Test Case?

English:

A test case is a step-by-step document to test a feature.

Example:

Login with valid username & password → Expect successful login.

Marathi:

Test case म्हणजे एखादी functionality तपासण्यासाठी लिहिलेले steps.

🔗 Q3. Difference between Smoke & Regression Testing?

Smoke	Regression
Basic testing	Full testing
After new build	After bug fix

Marathi:

Smoke = build काम करत आहे का

Regression = जुनं feature बिघडलं नाही ना

✓ PART 4: API TESTING (VERY IMPORTANT 🔥)

🔗 Q4. What is API?

English:

API connects frontend and backend.

Example:

Mobile app → API → Database → Response

Marathi:

API म्हणजे frontend आणि backend मधला bridge.

🔗 Q5. How do you test API in Postman?

English (Steps):

1. Open Postman
2. Select method (GET/POST)
3. Enter URL
4. Add headers/body
5. Send request
6. Validate response, status code

Marathi:

Postman मध्ये request पाठवून response check करतो.

🔗 Q6. What status codes you know?

Code Meaning

200	Success
201	Created
400	Bad Request
401	Unauthorized
404	Not Found
500	Server Error

Marathi:

200 म्हणजे success, 400 म्हणजे request चूक आहे.

✓ PART 5: BANKING DOMAIN QUESTIONS (GOLD ☆)

❓ Q7. What is NEFT / RTGS / IMPS?

English:

- NEFT – Normal speed, batch based
- RTGS – Real time, high amount
- IMPS – Instant transfer 24×7

Marathi:

- NEFT – थोडा वेळ लागतो
 - RTGS – लगेच transfer, मोठी रक्कम
 - IMPS – instant, 24×7
-

❓ Q8. What happens if OTP is invalid?

English:

Transaction should fail and proper error message should be shown.

Marathi:

OTP चुकीचा असेल तर transaction fail झाली पाहिजे.

❓ Q9. What is JWT?

English:

JWT is a token used for secure authentication.

Marathi:

JWT म्हणजे secure login साठी वापरला जाणारा token.

✅ PART 6: PROJECT BASED QUESTIONS

❓ Q10. Tell me one critical test scenario from your project.

English:

If balance is insufficient, transaction should fail with proper message.

Marathi:

Balance कमी असेल तर transaction होऊ नये.

✔ PART 7: HR QUESTIONS

❓ Why should we hire you?

English:

I have strong banking domain knowledge and hands-on API testing experience.

Marathi:

मला banking domain चांगला येतो आणि API testing चा practical experience आहे.

🔥 FINAL INTERVIEW TIPS (IMPORTANT)

✔ English + Marathi Mix चालतो

✔ Calm बोला

✔ Real project examples द्या

✔ Banking keywords वापरा

छान 👍

खाली मी तुम्हाला Manual Testing + API Testing साठी खूप जास्त interview questions देत आहे — English + Marathi, simple language, examples सह.
हे questions वाचले तर 90% interview cover होतील.

✔ MANUAL TESTING INTERVIEW QUESTIONS

◆ Q1. What is Software Testing?

English:

Software testing is the process of checking software to find defects.

Example:

Check login works correctly.

Marathi:

Software testing म्हणजे software मध्ये चूक आहे का ते तपासणे.

◆ Q2. What is STLC?

English:

STLC = Software Testing Life Cycle.

Steps:

Requirement → Test Plan → Test Case → Execution → Bug → Closure

Marathi:

STLC म्हणजे testing ची पूर्ण process.

◆ Q3. Difference between Verification & Validation?

Verification	Validation
--------------	------------

Check document	Check product
----------------	---------------

Before build	After build
--------------	-------------

Marathi:

Verification = कागदावर check

Validation = software चालवून check

◆ Q4. What is Bug Life Cycle?**English:**

New → Open → Fixed → Retest → Closed

Marathi:

Bug कसा पुढे जातो ते process.

◆ Q5. What is Severity & Priority?**English:**

Severity = impact

Priority = urgency

Example:

Login fails → High severity, High priority

Marathi:

Severity = किती मोठी चूक

Priority = किती लवकर fix करायची

◆ Q6. Difference between Smoke & Sanity Testing?

English:

Smoke = basic testing

Sanity = specific testing

Marathi:

Smoke = build चालतो का

Sanity = specific fix check

◆ Q7. What is Regression Testing?

English:

Testing old features after new changes.

Marathi:

नवीन बदलानंतर जुनं feature बिघडलं का ते check.

◆ Q8. What is Test Scenario?

English:

High-level testing condition.

Example:

Login functionality testing.

Marathi:

Test scenario म्हणजे काय test करायचं याची कल्पना.

◆ Q9. Difference between Test Case & Test Scenario?

English:

Scenario = what to test

Test case = how to test

Marathi:

Scenario = काय

Test case = कसं

◆ Q10. What is Negative Testing?

English:

Testing with invalid data.

Example:

Wrong OTP.

Marathi:

चुकीचा data टाकून testing.

✓ API TESTING INTERVIEW QUESTIONS**◆ Q11. What is API?****English:**

API connects frontend and backend.

Marathi:

API म्हणजे frontend आणि backend मधला bridge.

◆ Q12. Difference between SOAP & REST?

SOAP REST

XML JSON

Heavy Lightweight

Marathi:

SOAP जड, REST हलकं.

◆ Q13. What HTTP methods you used?**English:**

GET, POST, PUT, DELETE

Marathi:

GET = data घेणे

POST = data पाठवणे

◆ Q14. What is API status code?

English:

Response code from server.

Marathi:

Server चा reply code.

◆ Q15. Common Status Codes?**Code Meaning**

200 Success

201 Created

400 Bad request

401 Unauthorized

404 Not found

500 Server error

◆ Q16. What is Header & Body in API?**English:**

Header = metadata

Body = actual data

Marathi:

Header = माहिती

Body = data

◆ Q17. What is Authentication in API?**English:**

Security check.

Example:

JWT Token.

Marathi:

Security साठी authentication.

◆ Q18. What is JWT?

English:

Secure token.

Marathi:

Secure login token.

◆ Q19. How do you validate API response?**English:**

Check status code, response body, response time.

Marathi:

Response बरोबर आहे का ते check.

◆ Q20. Difference between 401 & 403?**English:**

401 = Unauthorized

403 = Forbidden

Marathi:

401 = login नाही

403 = परवानगी नाही

☑ REAL PROJECT QUESTIONS (BANKING FOCUS 🔥)**◆ Q21. What API you tested in banking?****English:**

Fund transfer, login, balance inquiry.

Marathi:

Fund transfer, login, balance API.

◆ Q22. What happens if balance is insufficient?**English:**

Transaction fails.

Marathi:

Transaction fail होते.

◆ Q23. How do you test OTP?

English:

Valid, invalid, expired OTP.

Marathi:

योग्य, चुकीचा, expire OTP.

◆ Q24. How do you log API bugs?

English:

JIRA with request/response screenshots.

Marathi:

JIRA मध्ये bug log करतो.

◆ Q25. What is Idempotency?

English:

Multiple requests give same result.

Marathi:

एकच result वारंवार.

🔥 VERY IMPORTANT LAST QUESTIONS

◆ Q26. Difference between UI & API Testing?

English:

UI = frontend

API = backend

Marathi:

UI = दिसतं

API = आतलं

◆ Q27. Why API testing is important?

English:

Fast, reliable, backend validation.

Marathi:

API testing जलद आणि मजबूत.

◆ Q28. How do you ensure API security?

English:

Token, authorization, encryption.

Marathi:

Token, security check.

✓ **FINAL PREPARATION PLAN (3 DAYS)**

Day 1: Manual Testing

Day 2: API Testing

Day 3: Banking + Mock Interview

👉 पुढे हवं असेल तर मी:

छान 👍

खाली मी तुम्हाला **Manual Testing + API Testing interview preparation “खूप सविस्तर”** देत आहे —

✓ **English + Marathi**

✓ **Simple language**

✓ **Real project examples (Banking / Fintech)**

हे नीट अभ्यासले तर **interview confidently clear करता येईल.**

🔥 **MANUAL TESTING – DETAILED QUESTIONS WITH EXAMPLES**

✓ **Q1. What is Manual Testing?**

English (Simple)

Manual testing means testing software **by hand** without automation tools.

Example:

Login page → enter username & password → click login → check success or error message.

Marathi

Manual testing म्हणजे software हाताने तपासणे, tool न वापरता.

उदाहरण:

Login करताना चुकीचा password टाकला → “Invalid password” message आला पाहिजे.

✓ **Q2. What is SDLC?**

English

SDLC = Software Development Life Cycle

Steps:

1. Requirement
2. Design
3. Development
4. Testing
5. Deployment
6. Maintenance

Marathi

SDLC म्हणजे software बनवण्याची पूर्ण process.

उदाहरण:

Bank app तयार करणे → आधी requirement → नंतर testing → मग live.

✓ **Q3. What is STLC?**

English

STLC = Software Testing Life Cycle

Steps:

1. Requirement analysis
2. Test planning
3. Test case writing
4. Test execution

5. Bug reporting
6. Test closure

Marathi

STLC म्हणजे testing कशी केली जाते त्याची process.

✓ Q4. What is Test Case?

English

A test case is a **step-by-step instruction** to test a feature.

Example Test Case:

- Step: Enter valid username & password
- Expected Result: Login successful

Marathi

Test case म्हणजे testing साठी लिहिलेली पायरी-पायरीची माहिती.

✓ Q5. What is Test Scenario?

English

Test scenario is a **high-level condition**.

Example:

Test login functionality.

Marathi

Test scenario म्हणजे काय test करायचं याची कल्पना.

✓ Q6. Difference between Test Case & Test Scenario?

Test Scenario	Test Case
---------------	-----------

What to test	How to test
--------------	-------------

High level	Detailed
------------	----------

✓ Q7. What is Positive & Negative Testing?

English

- Positive: Valid input
- Negative: Invalid input

Example:

Positive → correct OTP

Negative → wrong OTP

Marathi

योग्य data = positive

चुकीचा data = negative

✓ Q8. What is Regression Testing?

English

Testing existing features after new changes.

Example:

New feature added → old login still works?

Marathi

नवीन बदलानंतर जुनं feature बिघडलं का ते check.

✓ Q9. What is Smoke Testing?

English

Basic testing to check build stability.

Marathi

Build चालतो का ते basic check.

✓ Q10. Bug Life Cycle (Explain)

English

New → Assigned → Fixed → Retest → Closed

Marathi

Bug सापडल्यापासून बंद होईपर्यंतचा प्रवास.

API TESTING – DETAILED WITH EXAMPLES

✓ Q11. What is API?

English

API connects **frontend** and **backend**.

Example:

Mobile app → API → Database → Response

Marathi

API म्हणजे app आणि database मधला दुवा.

✓ Q12. Why API Testing is important?

English

- Faster than UI
- Backend validation
- Less dependency on UI

Marathi

API testing जलद आणि मजबूत असते.

✓ Q13. What HTTP methods you used?

English + Example

- GET → Get balance
- POST → Fund transfer
- PUT → Update profile
- DELETE → Remove beneficiary

Marathi

GET = data घेणे
POST = data पाठवणे

✓ **Q14. How do you test API in Postman?**

English (Steps)

1. Open Postman
2. Select method (POST)
3. Enter URL
4. Add header (Authorization)
5. Add body (JSON)
6. Send request
7. Validate response

Marathi

Postman मध्ये request पाठवून response check करतो.

✓ **Q15. What is Status Code?**

English

Response code from server.

Code Meaning

- | | |
|-----|--------------|
| 200 | Success |
| 400 | Bad request |
| 401 | Unauthorized |
| 500 | Server error |

Marathi

Server कडून आलेला reply number.

✓ **Q16. What is Header & Body?**

English

- Header → token, content type
- Body → actual data

Marathi

Header = security माहिती
Body = data

✓ Q17. What is Authentication & Authorization?

English

- Authentication → Who you are
- Authorization → What you can do

Marathi

Authentication = तुम्ही कोण
Authorization = तुम्हाला काय परवानगी

✓ Q18. What is JWT?

English

JWT is a secure token for authentication.

Example:

After login → token generated → used in API calls.

Marathi

JWT म्हणजे secure login token.

✓ Q19. How do you validate API response?

English

- Status code
- Response body
- Error message
- Response time

Marathi

Response बरोबर आहे का ते तपासतो.

✓ Q20. API Testing in Banking (Real Example)

English

Fund transfer API testing:

- Valid amount → success
- Invalid beneficiary → fail
- Insufficient balance → fail

Marathi

Banking API मध्ये transaction fail/success check.

🔥 MOST ASKED BANKING API QUESTIONS

✓ Q21. What happens if OTP expired?

English: Transaction fails

Marathi: Transaction fail

✓ Q22. How do you test UPI?

English: Valid VPA, invalid VPA, timeout

Marathi: योग्य/चुकीचा UPI ID

☆ FINAL INTERVIEW CONFIDENCE TIPS

- ✓ Example शिवाय answer देऊ नका
 - ✓ Banking words वापरा
 - ✓ Calm बोला
 - ✓ “In my project...” असा start करा
-

👉 पुढे मी देऊ शकतो:

- ✓ **Mock Interview (You answer, I correct)**
- ✓ **SQL interview questions with examples**
- ✓ **Netwin specific API questions**
- ✓ **Salary negotiation answers**

फक्त सांगा: “Next mock interview start kara” 😊

छान 👍

खाली मी तुम्हाला SQL Interview Questions – खूप सविस्तर,

✓ English + Marathi

✓ Simple language

✓ Real Banking / API project examples

देणार आहे.

हे तयार केले आहे QA / API / Banking Tester interview लक्षात घेऊन.

🔥 SQL INTERVIEW QUESTIONS WITH EXAMPLES (QA / BANKING)

✓ Q1. What is SQL?

English (Simple)

SQL (Structured Query Language) is used to **store, fetch, update, and delete data** from a database.

Example:

Get customer account balance from database.

Marathi

SQL म्हणजे database मधील data **घेणे, बदलणे, delete करणे** यासाठी वापरली जाणारी भाषा.

उदाहरण:

Customer चा balance database मधून पाहणे.

✓ Q2. What is Database?

English

A database is a place where data is stored in tables.

Example:

Bank database has customer, account, transaction tables.

Marathi

Database म्हणजे data ठेवायची जागा.

✓ Q3. What is Table?

English

A table stores data in rows and columns.

Example:

Account table → account_no, balance, status

Marathi

Table म्हणजे data ठेवण्याचा तक्ता.

✓ Q4. What is Row & Column?

English

- Row → One complete record
- Column → One field

Example:

One customer details = one row

Marathi

Row = एक पूर्ण record

Column = एक माहितीचा प्रकार

✓ Q5. What is Primary Key?

English

Primary key uniquely identifies a record.

Example:

Account number, Customer ID

Marathi

Primary key म्हणजे प्रत्येक record वेगळा ओळखण्यासाठी असलेली key.

✓ **Q6. What is Foreign Key?**

English

Foreign key links two tables.

Example:

customer_id in account table

Marathi

Foreign key म्हणजे दोन table जोडणारी key.

✓ **Q7. What is SELECT statement?**

English

Used to fetch data.

```
SELECT * FROM account;
```

Marathi

SELECT वापरून data पाहतो.

✓ **Q8. SELECT with WHERE clause**

English

Fetch specific data.

```
SELECT balance FROM account WHERE account_no = 12345;
```

Marathi

WHERE वापरून specific record काढतो.

✓ **Q9. Difference between WHERE and HAVING?**

WHERE

Used with rows

Before GROUP BY

HAVING

Used with groups

After GROUP BY

Marathi

WHERE = direct condition

HAVING = group वर condition

✓ Q10. What is INSERT?

English

Used to add new data.

```
INSERT INTO account VALUES (12345, 'Rahul', 5000);
```

Marathi

INSERT म्हणजे नवीन data टाकणे.

✓ Q11. What is UPDATE?

English

Used to modify data.

```
UPDATE account SET balance = 7000 WHERE account_no = 12345;
```

Marathi

UPDATE म्हणजे data बदलणे.

✓ Q12. What is DELETE?

English

Used to remove data.

```
DELETE FROM account WHERE account_no = 12345;
```

Marathi

DELETE म्हणजे data काढून टाकणे.

✓ **Q13. Difference between DELETE & TRUNCATE?**

DELETE	TRUNCATE
Row by row	All rows
Can rollback	Cannot rollback

Marathi

DELETE = काही records

TRUNCATE = पूर्ण table साफ

✓ **Q14. What is JOIN?**

English

JOIN combines data from multiple tables.

Marathi

JOIN म्हणजे दोन tables जोडणे.

✓ **Q15. Types of JOIN**

Join	Meaning
INNER JOIN	Common data
LEFT JOIN	Left + common
RIGHT JOIN	Right + common

✓ **Q16. INNER JOIN Example (Banking)**

English

```
SELECT c.name, a.balance
FROM customer c
INNER JOIN account a
ON c.customer_id = a.customer_id;
```

Marathi

Customer आणि account data जोडला.

✓ **Q17. What is COUNT, SUM, AVG?**

English

- COUNT → number of rows
- SUM → total
- AVG → average

```
SELECT COUNT(*) FROM transaction;
```

Marathi

COUNT = किती records

SUM = एकूण रक्कम

✓ **Q18. What is GROUP BY?**

English

Groups data.

```
SELECT account_no, SUM(amount)
FROM transaction
GROUP BY account_no;
```

Marathi

GROUP BY म्हणजे data group करणे.

✓ **Q19. What is ORDER BY?**

English

Sort data.

```
SELECT * FROM account ORDER BY balance DESC;
```

Marathi

ORDER BY म्हणजे data sort करणे.

✓ **Q20. Difference between CHAR & VARCHAR?**

CHAR VARCHAR

Fixed size Variable size

🔥 SQL QUESTIONS FROM REAL BANKING PROJECT

✓ Q21. How do you validate API data with SQL?

English

Compare API response with database data.

Marathi

API response आणि database data match करतो.

✓ Q22. How do you check fund transfer entry?

English

Check debit & credit entry in transaction table.

```
SELECT * FROM transaction WHERE txn_id = 'TXN123';
```

Marathi

Transaction table मध्ये entry check करतो.

✓ Q23. What is NULL?

English

NULL means no value.

Marathi

NULL म्हणजे value नाही.

✓ Q24. Difference between NULL & 0?

English

NULL = no value

0 = value is zero

Marathi

NULL = रिकामं

0 = शून्य

✓ Q25. What is Index?

English

Index improves query performance.

Marathi

Index query जलद करते.

☆ MOST IMPORTANT INTERVIEW TIP

Answer असे बोला:

“In my banking project, I used SQL to validate API response...”

👉 पुढे हवे असल्यास मी:

- ✓ Advanced SQL queries
- ✓ Complex JOIN questions
- ✓ SQL + API real scenario
- ✓ Mock SQL interview

तयार करून देईन.

फक्त सांगा 👍

छान 👍

खाली मी तुम्हाला **ADVANCED SQL + REAL BANKING SCENARIOS + MOCK INTERVIEW**

👉 English + Marathi,

👉 Simple language,

👉 Practical examples (QA / API / Banking)

सविस्तर देत आहे.

ADVANCED SQL INTERVIEW QUESTIONS (BANKING / API QA)

✓ Q1. What is Subquery?

English

A subquery is a query inside another query.

Example (Find customers with balance > average balance):

```
SELECT name
FROM account
WHERE balance > (SELECT AVG(balance) FROM account);
```

Marathi

Subquery म्हणजे query च्या आत query.

उदाहरण:

ज्यांचा balance average पेक्षा जास्त आहे ते customers.

✓ Q2. What is Correlated Subquery?

English

Subquery depends on outer query.

Marathi

Inner query outer query वर depend असते.

✓ Q3. What is UNION vs UNION ALL?

UNION	UNION ALL
-------	-----------

Removes duplicates	Keeps duplicates
--------------------	------------------

Slower	Faster
--------	--------

```
SELECT account_no FROM savings
UNION
SELECT account_no FROM current;
```

Marathi

UNION duplicate काढतो, UNION ALL नाही.

✓ Q4. What is EXISTS?

English

Checks if record exists.

```
SELECT name FROM customer c
WHERE EXISTS (
    SELECT 1 FROM account a WHERE a.customer_id = c.customer_id
);
```

Marathi

EXISTS म्हणजे record आहे का ते check.

✓ Q5. What is CASE statement?

English

Used for conditional logic.

```
SELECT account_no,
CASE
    WHEN balance < 1000 THEN 'LOW'
    ELSE 'OK'
END AS status
FROM account;
```

Marathi

CASE म्हणजे if-else logic.

✓ Q6. What is ACID property?

English

- Atomicity
- Consistency
- Isolation

- Durability

Example:

Fund transfer → debit & credit both succeed or both fail.

Marathi

Transaction सुरक्षित ठेवण्यासाठीचे rules.

✓ **Q7. What is COMMIT & ROLLBACK?**

English

- COMMIT → save changes
- ROLLBACK → undo changes

Marathi

COMMIT = save

ROLLBACK = मागे घेणे

✓ **Q8. What is Normalization?**

English

Remove duplicate data.

Marathi

Duplicate data कमी करणे.

✓ **Q9. What is Denormalization?**

English

Increase performance by adding redundancy.

Marathi

Performance साठी duplicate data ठेवणे.

✓ Q10. Difference between WHERE & ON?

English

- WHERE → filter rows
- ON → join condition

Marathi

WHERE = filter

ON = join

🔥 REAL BANKING SQL SCENARIOS (VERY IMPORTANT ☆)

✓ Scenario 1: Validate Fund Transfer API

English

Check debit entry:

```
SELECT * FROM transaction
WHERE account_no = 'A123' AND txn_type = 'DEBIT';
```

Check credit entry:

```
SELECT * FROM transaction
WHERE account_no = 'B456' AND txn_type = 'CREDIT';
```

Marathi

Debit आणि credit दोन्ही entry check करतो.

✓ Scenario 2: Check Insufficient Balance

```
SELECT balance FROM account WHERE account_no = 'A123';
```

Marathi

Balance कमी आहे का ते check.

✓ Scenario 3: Validate OTP

```
SELECT otp, expiry_time
FROM otp_table
WHERE user_id = 101;
```

Marathi

OTP valid आहे का ते database मधून check.

✔ Scenario 4: API Response vs DB Validation

English

API balance = DB balance should match.

Marathi

API response आणि database value same पाहिजे.

✔ Scenario 5: Duplicate Transaction Check

```
SELECT txn_id, COUNT(*)
FROM transaction
GROUP BY txn_id
HAVING COUNT(*) > 1;
```

Marathi

Duplicate transaction आहे का ते check.

MOCK SQL INTERVIEW (PRACTICE)

🔗 Interviewer:

How do you validate fund transfer using SQL?

✔ Best Answer (English):

In my banking project, after fund transfer API success response, I verify debit entry from sender account and credit entry in receiver account using SQL queries. I also validate transaction status and balance update.

✔ Marathi:

Fund transfer झाल्यावर sender account मधून debit आणि receiver account मध्ये credit entry SQL वापरून check करतो.

? Interviewer:

What if API shows success but DB entry missing?

Answer:

English:

It is a critical defect – data inconsistency.

Marathi:

ही critical bug आहे.

? Interviewer:

How do you check performance issue using SQL?

English:

Check slow queries, missing indexes.

Marathi:

Slow query आणि index check करतो.

☆ HOW TO ANSWER CONFIDENTLY (FORMULA)

👉 Always say:

“In my banking project...”

👉 Structure:

1. Scenario
 2. SQL Query
 3. Expected Result
-

✓ FINAL 5-DAY REVISION PLAN

Day 1: Basic SQL

Day 2: JOIN + GROUP BY

Day 3: Subquery + CASE

Day 4: Banking Scenarios

Day 5: Mock Interview Practice

छान 👍

खाली मी तुम्हाला Netwin Infosolutions (Nashik) साठी company-specific interview questions देत आहे —

👉 Manual + API + Banking + SQL focus

👉 English + Marathi

👉 Real Netwin-type project examples (Fintech / Core Banking)

हे questions Netwin interview मध्ये direct किंवा indirect विचारले जातात.

🔥 NETWIN COMPANY SPECIFIC INTERVIEW QUESTIONS

(QA Engineer – Manual & API, Banking Domain)

✅ Q1. What do you know about Netwin Infosolutions?

English (Best Answer)

Netwin Infosolutions is a Nashik-based IT company that works mainly on **Banking, Fintech, ERP, and Enterprise applications**. The company focuses on **secure, scalable, and domain-driven solutions**, especially for banking clients.

Marathi

Netwin Infosolutions ही नाशिकमधील IT कंपनी आहे जी मुख्यतः **Banking, Fintech आणि ERP applications** वर काम करते. Secure आणि reliable banking solutions तयार करणे हा त्यांचा मुख्य focus आहे.

✅ Q2. Why do you want to join Netwin?

English

I want to join Netwin because it works extensively in the **banking and fintech domain**, which matches my experience in **core banking, fund transfer APIs, and authentication testing**. I also prefer working in a domain-focused company like Netwin.

Marathi

मला Netwin मध्ये काम करायचं आहे कारण कंपनी **banking आणि fintech domain** वर काम करते, जो माझा strong area आहे. माझा अनुभव Netwin च्या projects ला योग्य आहे.

✓ Q3. What type of projects does Netwin handle?

English

Netwin handles:

- Core Banking Systems
- Fund Transfer & Payment Systems
- Authentication & Security Modules
- Enterprise & ERP applications

Marathi

Netwin चे projects:

- Core Banking
 - Payment & Fund Transfer
 - Security & Authentication
 - ERP systems
-

✓ Q4. How will you test a Core Banking application?

English (Step-by-Step)

1. Understand banking requirement
2. Write test scenarios for NEFT/RTGS/IMPS
3. Test positive & negative cases
4. Validate API response
5. Verify database entries using SQL

Marathi

1. Requirement समजून घेणे
2. Fund transfer scenarios लिहिणे

3. Positive/Negative testing
 4. API response check
 5. SQL वापरून DB verify
-

✓ **Q5. How will you test Fund Transfer API (Netwin type project)?**

English

I will test:

- Valid amount transfer
- Invalid beneficiary
- Insufficient balance
- Duplicate transaction
- OTP & JWT validation

After API success, I will verify **debit & credit entry in database.**

Marathi

मी fund transfer API साठी:

- योग्य रक्कम
 - चुकीचा beneficiary
 - कमी balance
 - OTP/JWT
- हे test करतो आणि SQL ने debit/credit check करतो.
-

✓ **Q6. Netwin works on secure systems. How do you test security?**

English

I test security by:

- Authentication (valid/invalid token)
- Authorization (role-based access)
- OTP expiry & reuse
- API access without token

Marathi

मी security testing मध्ये:

- Token valid/invalid

- Role based access
 - OTP expiry
 - Token शिवाय API access हे check करतो.
-
